Date  
30/12/2019

### The Role

This is an exciting new position for a PHP Developer who is looking to enhance their skills and be deeply involved in active programming and software development. With a long-term programme of continual improvement, you will be working as part of a small team that provides services used by many of the world's largest organisations.

Supported by experts with over 25 years' experience of delivering enterprise systems, you will be deeply involved in both the design and development of the projects you're working on and your thoughts and inputs will be heavily valued.

There will be many opportunities, some which we may offer, some which you may identify yourself. Your role is to make the most of them.

### You

If you're good at PHP and have some of the required skills (or want to learn them), and if you don't like dull work or being told when or how to work, then get in touch.

If you like finding new ways to do things, fully understanding objectives, solving challenges quickly, and being surprisingly brilliant at the unexpected, then you will fit right in.

Enthusiasm, potential, and the right attitude are more important than experience.

### Skills

- Willingness to learn - required
- Eye for detail - required
- Something interesting - required
- PHP - required
- Laravel - desired
- PostgreSQL - desired
- APIs - desired
- HTML, CSS, JavaScript - desired

### The Company

At the forefront of our industry, Pure Energi's core product line includes registry systems that underpin renewable energy certification and trade in over 30 countries. With users from over 150 organisations, including some of the world's leading brands, our continual challenge is to remain robust and secure whilst at the same time delivering a service that can rapidly respond to changing demands. Activity growth rates over the past five years have exceeded 100% per year. With future demand closely aligned to increasing climate change action amongst major corporates and their supply chains, we have a long-term programme of frequent major service upgrades.

You will be joining a very relaxed and friendly team of passionate people who are able to learn from one another. With the main service and development team based in Sheffield, we work closely with our administration and regulation team in the Netherlands. We provide excellent initial and ongoing training and invest a great deal into personal development, with opportunities for career progression and engaging projects a key part of our responsibility to you.

### Package Description

- Great salary with bonus potential, pension, and personal training budget
- Flexible working (hours and location, with working from home options)
- Flexible holiday allowance
- Travel opportunities (office in the Netherlands, global developer partners)
- Opportunities to be involved in joint ventures with equity
